EDUCATION

Kennesaw State University | Kennesaw, GA | *B.S. Industrial & Systems Engineering* | Exp. May 2028

- **GPA: 3.62 / 4.00** | KSU Honors | **Coursework:** Calculus II, Probability & Stats I, Supply Chain Optimization

DATA & SYSTEMS EXPERIENCE

GE Appliances (Haier) | Louisville, KY *Industrial Engineering & Optimization Co-op* | Aug 2026 – Dec 2026

- **Driving** a targeted **\$150,000 cost-reduction** initiative across high-volume assembly lines as part of a rotational co-op program.
- **Engineering** statistical time studies and 3D spatial models to identify root causes and optimize operational cycle-time bottlenecks.

Sierra Sheet and Plate (STS Metals) | Covington, GA *Process Engineering & Data Intern* | Summer 2026

- Engineered **automated Excel data pipelines** and real-time dashboards to flag anomalies, saving management **2 hours weekly**.
- Developed a custom relational inventory system utilizing **Microsoft Power Apps** and SharePoint to eliminate critical supply chain data blind spots.

COMPUTATIONAL & AI PROJECTS

AI Routing & Application Architecture | Independent Project | 2026 – Present

- Architecting a field crew app solving **vehicle routing optimization** via a **multi-LLM orchestration framework** (Claude, GPT, Gemini).
- Directing backend Python algorithms while utilizing sandboxed local agents (**Qwen**) to stress-test routing logic and ensure data security.

KSU Formula SAE | Kennesaw, GA *Simulation & Systems Engineer* | Fall 2025 – Present

- Executed computational audits analyzing theoretical CAD geometry discrepancies against physical telemetry data and structural tolerances.

KSU Undergraduate Research | Kennesaw, GA *Lead Robotics Modeler* | Fall 2025 – Spring 2026

- Developed algorithmic scripts for actuator synchronization, resulting in stable computational gait cycles and precise mechatronic control.
- Conducted rigorous stress-testing and statistical data collection across **12+ design iterations** to maximize payload efficiency.

TECHNICAL SKILLS

- **Programming & Data:** Python (Pandas/NumPy), SQL, MS Excel (Advanced Nested Formulas), Power Apps.
- **AI & Analytics:** Statistical Modeling, Multi-LLM Orchestration, Sandboxed AI Agents (Qwen), Cybersecurity Protocols.
